IDENTIFIERS *Ohio Instructional Grants

ABSTRACT

The Ohio Instructional Grant Program is a financial aid program designed to assist low and middle income students who are enrolled for full-time undergraduate study in eligible Ohio institutions of higher education. These grants are not intended to cover all college costs nor are they intended to meet the total unmet need of participating students. Ohio Instructional Grants serve as one source of student assistance and should be combined with available funds from other financial aid programs. The major objective of the Ohio Instructional Grant Program is to assist in the elimination of the economic barrier that discourages many promising students in their plans to seek higher education. These grants are not awarded upon the basis of scholarship, as such, but upon the basis of relative financial need. Sections of this report cover the Ohio Instructional Grant Act; the purpose of the program; student profile, and student profile charts; financial profile, and financial charts and tables. Statistical tables accompany the text.

OHIO INSTRUCTIONAL GRANT ACT

In accordance with the provisions of Section 3333.12 of the Ohio Revised Code enacted into law by the 108th Ohio General Assembly in 1969 and subsequent revisions made by the 109th and 110th Ohio General Assemblies in 1971 and 1973, the Ohio Board of Regents shall administer the Ohio Instructional Grant Program for undergraduate students enrolled during the academic year 1973-74. The revision enacted by the 110th Ohio General Assembly reads as follows:

The Ohio Board of Regents shall establish and administer an instructional grant program for full-time undergraduate students in an Ohio institution of higher education which is state-assisted or which has received a certificate of authorization from the Board pursuant to Chapter 1713. of the Revised Code. The Board may adopt rules and regulations to carry out this section. The General Assembly shall support the instructional grant program by such sums and in such manner as it may provide, but the Board may also receive funds from other sources to support the program. If the amounts available for support of the program are inadequate to provide grants to all eligible students, preference in the payment of grants shall be in the following order: (1) freshmen; (2) sophomores; (3) juniors; and (4) seniors.

In order to be eligible for an instructional grant, a student shall be a resident of Ohio and shall be enrolled as a full-time student in an Ohio institution of higher education which meets the requirements of Title VI of the "Civil Rights Act of 1964." "Resident" and "full-time student" shall be defined by rules adopted by the Board. An instructional grant shall be paid to an eligible student through the college or university in which he is enrolled. Applications for such grants shall be made as prescribed by the Board of Regents and such applications may be made in conjunction with and upon the basis of information provided in conjunction with student assistance programs funded by agencies of the United States government or from financial resources of the institution of higher education. The college or university shall certify that the student applicant is enrolled as a full-time student. Instructional grants shall be provided to an eligible student only as long as he or she is enrolled and is making appropriate progress toward an associate or bachelor's degree. The grant shall cover two semesters or three quarters or the equivalent of one academic year.

Instructional grants shall be made to a student if the student is enrolled in an Ohio institution of higher education where the instructional and general fees are one thousand dollars or more for a two semester or three quarter academic year or if the student is enrolled in a technical education program of at least two years duration sponsored by a private institution of higher education. The grant shall not exceed the total instructional and general charges of the institution. The amount of the instructional grant shall be determined in accordance with the following table:

NUMBER OF DEPENDENT CHILDREN

<u>Adjusted Effective Income</u>	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5 or More</u>
\$ 4,000 - Under	\$1320	\$1320	\$1320	\$1320	\$1320
\$ 4,001 - \$ 4,999	1200	1320	1320	1320	1320
\$ 5,000 - \$ 5,999	1050	1200	1320	1320	1320
\$ 6,000 - \$ 6,999	900	1050	1200	1320	1320
\$ 7,000 - \$ 7,999	750	900	1050	1200	1320
\$ 8,000 - \$ 8,999	600	750	900	1050	1200
\$ 9,000 - \$ 9,999	450	600	750	900	1050
\$10,000 - \$10,999	300	450	600	750	900
\$11,000 - \$13,999	150	300	450	600	750
\$14,000 - Over	-	-	-	-	-

Instructional grants shall be made to a student if the student is enrolled in an Ohio institution of higher education where the instructional and general fees are less than one thousand dollars for a two semester or three quarter academic year. The grant shall not exceed the total instructional and general charges of the institution. The amount of the instructional grant shall be determined in accordance with the following table:

<u>Adjusted Effective Income</u>	<u>NUMBER OF DEPENDENT CHILDREN</u>				
	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5 or More</u>
\$ 4,000 - Under	\$570	\$570	\$570	\$570	\$570
\$ 4,001 - \$ 4,999	510	570	570	570	570
\$ 5,000 - \$ 5,999	450	510	570	570	570
\$ 6,000 - \$ 6,999	390	450	510	570	570
\$ 7,000 - \$ 7,999	330	390	450	510	570
\$ 8,000 - \$ 8,999	270	330	390	450	510
\$ 9,000 - \$ 9,999	210	270	330	390	450
\$10,000 - \$10,999	150	210	270	330	390
\$11,000 - \$13,999	90	150	210	270	330
\$14,000 - Over	-	-	-	-	-

"Adjusted Effective Income" as used in this section shall be defined by rule adopted by the Ohio Board of Regents, and may take into account the income of the student and of the student's parents and spouse. Family income may be verified by supplying to the Board of Regents a copy of the federal government tax return, by authorizing access to the family federal government income tax return, or by other means satisfactory to the Board.

No grant shall be made to any student in a course of study leading to a degree in theology, religion, or other field of preparation for a religious profession.

Purpose of the Program

The Ohio Instructional Grant Program is a financial aid program designed to assist low and middle income students who are enrolled for full-time undergraduate study in eligible Ohio institutions of higher education. These grants are not intended to cover all college costs nor are they intended to meet the total unmet need of participating students. Ohio Instructional Grants serve as one source of student assistance and should be combined with available funds from other financial aid programs including Basic Grants, Educational Opportunity Grants, Work-Study, student loans and scholarships.

The major objective of the Ohio Instructional Grant Program is to assist in the elimination of the economic barrier which discourages many promising students in their plans to seek higher education. It is not the intent of the program to replace appropriate financial resources which are available to students to pay the cost of higher education, but rather to supplement these resources which include parental income as well as the student's own financial resources.

Ohio Instructional Grants are not awarded upon the basis of scholarship, as such, but upon the basis of relative financial need. Grants are awarded to the average as well as the superior student.

INTRODUCTION

Ohio Instructional Grants were made available to students enrolled during the 1973-74 academic year as freshmen, sophomores, juniors and seniors. Nineteen point eight million dollars was appropriated by the 110th Ohio General Assembly to fund the program. Fifty-two private colleges and universities, twelve state universities and their twenty branches, and twenty-three public two-year colleges participated in the program during the 1973-74 academic year.

Eligibility Requirements

In order to be eligible for consideration of a grant a student must meet the following requirements.

- (1) Be a resident of Ohio.
- (2) Be enrolled as a full-time undergraduate student in an eligible Ohio institution of higher education.
- (3) Be making appropriate progress toward an associate degree or a bachelor's degree.
- (4) Not be enrolled in a course of study leading to a degree in theology, religion, or other field of preparation for a religious profession.

Application Procedure

An Ohio student who is enrolled or plans to be enrolled in an eligible Ohio institution of higher education on a full-time basis must apply for an instructional grant through the Student Assistance Office of the Ohio Board of Regents.

The student obtains an application packet from either the high school counselor, the financial aid office of the college or the Board of Regents.

The student and the student's parents complete the application, and the income statement which is a part of the application, and submits these to the Student Assistance Office of the Ohio Board of Regents.

The Student Assistance Office then determines the amount to which the student is entitled based upon the family's adjusted effective income and the number of dependent children in the family.

The student then receives an award certificate which is submitted to the financial aid office of the college.

Method of Payment

The student receives the Ohio Instructional Grant through the financial aid office as provided by the Student Assistance Office of the Board of Regents. The grant is applied to the instructional and general charges of the college or university.

SECTION I

Student Profile

The following data reflect some academic as well as social and economic characteristics of the Ohio Instructional Grant recipients for the 1973-74 academic year. This profile is a result of a cooperative effort between the Student Assistance Office of the Ohio Board of Regents and the American College Testing Program. This office extends its appreciation to Tom Colaner of ACT for his special efforts in the development and implementation of this aspect of the Annual Report.

The following charts are based on freshmen class Ohio Instructional Grant recipients who took the A.C.T. and completed the student profile questionnaire during their senior year in high school prior to entering college in the 1973-74 academic year. The statistics in this report show that there is very little comparative difference between the A.C.T. scores of OIG recipients and the national norm. The composite of English, math, social studies and natural science scores for the grant recipients was 19.8% as compared with the national norm of 20.1%. However, grant recipients showed a 2.89 high school grade average as compared to a national average of 2.68.

In terms of proposed educational majors there was little difference between grant recipients and the national norm with the exception of the health field where 21% of the OIG freshmen indicated a preference as compared to only 9% of the national group.

With one exception, there were no significant differences in the level of educational degrees sought by the two groups: 17% of the grant recipients planned to seek doctorates as compared to 12% of the national norm.

In the area of special educational needs the grant recipients expressed less need for help in choosing a college major and improving reading, math, writing and study skills.

The grant recipients showed a greater interest in out-of-class achievements in areas such as science, music, writing, leadership and athletics. Some 53% of the OIG students participated in high school honors courses as compared to 35% of the national norm.

The single most significant difference between the grant recipients and the national group involved the need for financial assistance. Some 90% of the grant recipients expected to apply for financial aid throughout their college careers as compared to only 48% of the national norm. Some 47% indicated that they would need help in finding employment as compared to 27% of the national norm. This statistic indicates that it is not a question of whether needy students want to work to help themselves in school but rather a problem of finding employment.

The students were asked to indicate the single most important factor in making a college choice. These factors involved the intellectual reputation, social climate, location and size of a school, financial considerations, advice from parents and information from teachers and counselors.

Generally, differences here between the two groups were not significant, except in the area of financial considerations. Some 20% of the grant recipients listed this as the single most important factor in selecting a college as compared to 11% of the national norm.

SECTION II

FINANCIAL PROFILE

Appropriations

Nineteen point eight million dollars was appropriated by the 110th Ohio General Assembly to fund the program for the 1973-74 academic year. Fifty-two private colleges, twelve state universities and their branches, six two-year public community colleges and seventeen two-year public technical colleges participated in the program during this year.

Geographic Distribution of Grant Recipients

The figures in Table I indicate that 50.6% of all grant recipients reside in six counties -- Cuyahoga, Franklin, Hamilton, Mahoning, Montgomery, and Summit. Sixty-two percent of all recipients reside in these six counties plus Lorain, Lucas, Stark and Trumbull. This corresponds with the fact that the 1970 census report indicates that 59% of the Ohio population resides in these ten counties.

Minority students represent 25.5% of the total number of grant recipients. This is approximately a .5% increase over the 1972-73 total. A total of 10,400 minority students received grants which is an increase of 1,271 minority recipients over the 1972-73 total. Of the 10,400 minority students, 82.0% reside in seven counties -- Cuyahoga, Franklin, Hamilton, Lucas, Montgomery, Summit and Mahoning.

With Franklin County as the north-south division point, approximately 37% of all grant recipients reside in the 38 southern counties and 63% in the 50 northern counties.

Distribution of Grants by Type of Institution.

The average grant awarded to students attending private colleges was \$722 representing a 5.6% decrease under the average grant awarded during the 1972-73 academic year. Of all grant recipients 27% or 11,008 attended private colleges. This is a 15.7% increase over the 1972-73 total.

The average grant awarded to students attending public institutions was \$301 representing a 1.9% decrease under the average grant awarded during the 1972-73 academic year. Of all grant recipients 73% or 29,662 attended public institutions. This is an increase of 2,612 students over the 1972-73 totals, and represents 9.6%.

Of the \$19.8 million appropriation for the 1973-74 academic year, \$7,953,940 was utilized by 11,008 students attending private colleges, while \$8,934,306 was utilized by 29,662 students attending public institutions. Thus, 40,670 students utilized \$16,888,246 during the 1973-74 academic year.

Distribution of Grant Recipients by Institution

Of those grant recipients attending private colleges, 17% are Black, 61% live in urban communities, 95% are classified as dependent students and 80% come from double parent families.

Of those grant recipients attending four-year public institutions and their branches, 24% are Black, 67% live in urban communities, 92% are classified as dependent students and 74% come from double parent families.

The two-year public institutions reflect some distinct differences in student characteristics as compared to four-year public and private institutions. Black students represent 39% of those grant recipients attending two-year public institutions, and 72% live in urban communities, while 80% are classified as dependent students and 60% come from double parent families.

Distribution of Grant Recipients by Family Income

Of those recipients attending private colleges, 24.1% come from families with gross incomes of less than \$6,000 while of those attending four-year public institutions, 30.6% come from families with gross incomes of less than \$6,000. However, the most significant comparison is at the two-year public institutions where 46.2% of the recipients come from families with gross incomes of less than \$6,000. Regarding Black students, 57.9% come from families with gross incomes of less than \$6,000. Of all grant recipients, 25.6% or 10,428 come from families with gross income over \$11,000.

Of all grant recipients, 23% come from families with an adjusted effective income between \$0 and \$5,999; 17.5% come from families with an adjusted effective income between \$6,000 and \$7,999; 33.9% from families between \$8,000 and \$10,999; and 25.6% from families between \$11,000 and \$13,999.

Distribution by Grants Awarded

Of the grant recipients for 1973-74, 12.3% of those attending private colleges received maximum grant awards of \$1,320. At the four-year public institutions, 12.7% received maximum grant awards of \$570, while at the two-year publics 8% received maximum grant awards of \$570 and 50.1% received the maximum amount based on the instructional and general fees of such institutions. Overall, 11.5% received a maximum grant award.

Black Student Profile

Of all Black student recipients 19.1% attended private colleges, 62.4% attended four-year public institutions and 18.5% attended two-year public institutions. Of the total, 93.5% live in urban communities, 47.6% come from single parent families, and 53.9% come from families with three or more dependent children. Of all Black student recipients 51.9% come from families with adjusted effective incomes between \$0 and \$5,999.

Average Student Profile

Of all grant recipients, 72.9% attended public institutions; 69.3% came from families with gross incomes over \$6,000. The average recipient is 18 years old, white, comes from a double parent family and lives in an urban community. In terms of sex, 52% of the recipients are female and only in private colleges are there more male than female recipients (53% to 47%). In 67.4% of the families, one parent is working and in 21.6% of the families both parents are working. The average public school grant was \$301 and the average private school grant was \$722.

Distribution of Students by Class Level

Of the 40,670 recipients, 41% were freshmen, 28.3% were sophomores, 17.5% were juniors, and 13.1% were seniors. Over 15% of all full-time undergraduate students attending eligible participating institutions received assistance from the program.

State and Federal Programs

In addition to the Ohio Instructional Grant Program, the State of Ohio through the Ohio Student Loan Commission provides a Guaranteed Loan Program for Ohio students. Students may borrow up to \$2,500 per year from participating Ohio lending institutions.

The federal government provided four additional programs of financial assistance for Ohio students during the 1973-74 academic year -- the National Direct Student Loan Program (N.D.S.L.), the Supplemental Educational Opportunity Grants Program (E.O.G.), the College Work-Study Program, and the Basic Educational Opportunity Grants Program.

During the 1973-74 academic year, the federal government provided the following funding for Ohio institutions:

National Direct Student Loan	\$13,500,827
Supplemental Educational Opportunity Grant	8,727,556
College Work-Study	12,091,304
Basic Educational Opportunity Grant	<u>1,544,420</u>
TOTAL	\$35,864,107

The State of Ohio provided the following:

Ohio Instructional Grants	\$16,888,246
Ohio Insured Student Loans	<u>22,960,443</u>
TOTAL	\$39,848,689

Thus, a total of \$75,712,796 in assistance was given to Ohio's students. Of this total, 22.3% was provided by the Ohio Instructional Grant Program and 52.6% by the Ohio Instructional Grant Program and the Ohio Guaranteed Loan Program.
